

With Viking Pure, Clean Does Not Have a Smell

Our communities are cleaned and disinfected with Viking Pure Solutions, which don't have the standard scent of citrus, pine, or bleach. Contrary to common belief, these scents are NOT an indicator of cleanliness, and may actually pose risk of harm in the form of respiratory issues and other long-term health conditions.

- Many cleaning products with fragrances like citrus or pine contain **volatile organic compounds (VOCs)** that contribute to **indoor air pollution**.
- Fragrances often mask odors rather than actually eliminating them, potentially causing **health issues** over time.
- VOCs and synthetic scents can lead to **respiratory problems**, allergies, and other sensitivities.
- **Viking Pure's electrolyzed water cleaning and disinfecting solutions** are a safer alternative.
- They are **hypoallergenic, fragrance-free**, and contain **no harmful or toxic ingredients**.
- Made using just **salt, water**, and **electricity**, they provide effective cleaning and powerful disinfecting without releasing toxins.
- Their **odorless formula** ensures a pure, clean space without using artificial scents.

Viking Pure Disinfecting Solution

A powerful disinfectant and sanitizer that kills viruses, bacteria, pathogens and fungi.

Viking Pure Cleaning Solution

A versatile and effective multi-purpose cleaner and degreaser that replaces almost any other cleaning product.

**Both solutions are Green Seal certified
and better for the planet and people.**
