

Benefits of Viking Pure Cleaning Solution

Sodium hydroxide (NaOH) is the cleaning and degreasing agent produced by Viking Pure's electrolyzed water generator. It is a **multi-purpose cleaner** and **heavy-duty degreaser** that is safe for hard and soft surfaces, including carpets and upholstery (WoolSafe and CleanSeal approved!).

This natural, completely safe solution is produced through electrolysis: water and salt are electrically activated to separate the salt ions sodium and chloride. The result is a ready-to-use cleaner and degreaser that is safe for humans and the environment.

Traditional multi-purpose cleaning solutions contain toxic chemicals that have short- and long-term risks of harm from exposure or misuse.

-  Cause headaches, chronic respiratory problems, and/or allergic reactions
-  Irritate the eyes, throat or skin
-  Induce asthma in otherwise healthy individuals
-  Elevate risks of birth defects or reproductive issues
-  Cause cancer

In contrast, Viking Pure's sodium hydroxide cleaner and degreaser works better and poses no risk of harm to humans or the environment.

- No PPE required
- Green Seal Certified
- Approved for use on hard and soft surfaces
- No additional regulation or cost on disposal
- Natural, hypoallergenic, non-toxic cleaner and degreaser
- No additives, surfactants or fragrances with hidden chemicals
