

## Benefits of Viking Pure Disinfecting Solution

Hypochlorous acid (HOCl) is the antibacterial in Viking Pure Disinfecting Solution, a hospital grade disinfectant that kills bacteria, virus, fungi and blood-borne pathogens.

This natural, safe solution is produced through the electrolysis of salt combined with water resulting in a ready-to use disinfectant that is safe for humans and the environment.

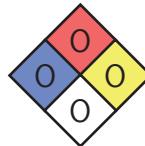

**Traditional disinfecting solutions like bleach contain toxic chemicals that have **short- and long-term risks of harm** from exposure or misuse.**

-  Cause headaches, chronic respiratory problems, and/or allergic reactions
-  Irritate the eyes, throat or skin
-  Induce asthma in otherwise healthy individuals
-  Elevate risks of birth defects or reproductive issues
-  Cause cancer

**In contrast, Viking Pure's hypochlorous acid (HOCl) disinfectant **works better and poses no risk of harm to humans or the environment.****

- No PPE required
- Green Seal Certified
- Approved for use on hard and soft surfaces
- No additional regulation or cost on disposal
- Food contact surface safe (no rinse post-application)
- No additives, surfactants or fragrances with hidden chemicals
- Natural, hypoallergenic, non-toxic disinfection & sanitization

Appears on the EPA's List N!

**HOCl is naturally produced by our white blood cells as an essential part of our immune system; it eliminates pathogens but is inherently harmless to the human body.**

***Hypochlorous acid—a potent and environmentally safe disinfectant***
